SUMMARY

Backend Developer with over a year's of experience in SaaS and FinTech applications. Strong in Laravel and Django with hands-on server operations (queues, Reverb, schedulers, basic monitoring). Ranked **3rd on the batch leaderboard** in AWS-focused DevOps training by Ostad Platform(ostad.app). Keen interest in backend development and infrastructure.

TECHNICAL SKILLS

Backend: Laravel, Django, DRF **Frontend:** React (basic), Tailwind CSS **Languages:** PHP, Python, JS (ES6+), C/C++
DevOps: Docker, Nginx, YML (CI / CD), GitHub Actions, AWS (EC2, S3, VPC), Systemd, Grafana Cloud, n8n **Server Ops:** SMTP, PM2, Queues, Reverb, schedulers, journalctl, Raw Linux, CPanel, Cloud Panel, Hostinger
Data & Auth: PostgreSQL, Supabase, JWT, OAuth2, WebSockets **Payments:** Stripe Connect, NowPayments, Revolut, SSLCommerz

PROFESSIONAL EXPERIENCE

SoftVence — Betopia Group

Oct 2025 – Present

Backend Developer

- Built multi-vendor SaaS and FinTech platforms with Stripe Connect, recurring billing, and crypto payments via NowPayments.
- Configured queue workers, Laravel Reverb, and task schedulers on Linux; handled basic service monitoring and uptime checks.
- Deployed containerized apps on AWS EC2/S3 with Docker and Nginx; set up CI/CD via GitHub Actions and workflow automation with n8n.

Codexaa Limited

Apr 2025 – Sep 2025

Backend Developer Intern

- Built Laravel-based e-commerce, CMS, and ERP systems; extended Odoo modules and developed REST APIs for frontend clients.

KEY PROJECTS

Centralised Observability Stack for Multi-VPS Infrastructure

[GitHub](#)

Prometheus Alloy · Grafana Cloud · Nginx · Caddy · Node Exporter

- Deployed system-level monitoring across 3 diverse servers using Prometheus Node Exporter.
- Streamed telemetry data via Prometheus Alloy directly to Grafana Cloud, bypassing self-hosted storage.

On-Demand SSL Engine for Multi-Tenant SaaS

[GitHub](#)

Laravel · Caddy · Nginx · Dynamic Multi-Tenancy

- Built an edge ingress pipeline with dynamic TLS provisioning (Let's Encrypt) triggered via Caddy callbacks querying a Laravel validation API.
- Reverse-proxied decrypted traffic through Nginx with host-header scoping to isolate multi-tenant database queries in Laravel middleware.

Channel-Gum

[Live Site](#)

Laravel · Reverb · NowPayments · OAuth2

- Backend and server management for a real-time freelance marketplace with WebSocket chat, Google OAuth2, role-based access, and crypto payment integration.

District NGO

[Github 1](#) | [Github 2](#) | [Frontend](#) | [Backend](#)

Laravel · PostgreSQL · Docker · Sanctum

- React frontend with API integration of the backend dashboard, hosted on Vercel.
- Containerized Laravel app with RBAC via Sanctum; deployed on Render.com backed by Supabase PostgreSQL.

EDUCATION & RESEARCH

Graduation: Bangladesh University of Professionals

CGPA: 3.52

Bachelor of Information & Communication Engineering

Research: ASD Detection with Residual CNN

89% Accuracy

- PyTorch pipeline for Autism Spectrum Disorder detection using 2D fMRI data from 580 subjects across 20 sites.

CERTIFICATIONS & ACTIVITIES

AWS-Focused DevOps — Ostad.app

Ranked **3rd** on batch leaderboard
